

NOKIA 110

Talk when you want, for as long as you want. What do vacations and battery lives have in common? The longer they last, the better. HMD 110 has a 1000 mAh¹ removable battery that lasts for up to 18 days on standby.² So, whether you're at work or on holiday, there's time to talk.

Looks good, feels good. The stylish streak that runs across every edge of the phone is more than a design choice – it's a solid inner frame that gives HMD 110 some real toughness. The double-acts continue with the nano-patterned ceramic coating on the back which gives it a great feel and a stunning sheen.

It's your camera, your jukebox, and more. On the practical side of things, there's a voice recorder³, a dual LED flashlight, and room for up to 2000 contacts. But here's the fun part: there's a camera with LED flash, an FM radio, MP3 player³, and of course, the Snake game.

Big buttons. Big screen. Big thumbs-up. Bigger isn't always better – but it is when you're talking about screen size. The 2.0" display is a big step up from the 1.77" display on previous models. Combine this with a large, tactile keypad and HMD 110 is simply a pleasure to use.
